

PAYROLL CONTRIBUTION ASCII FILE LAYOUT AND REQUIREMENTS

Date: Feb 07 2023

1. OVERVIEW OF FILE LAYOUT CHANGES

- All fields are required unless explicitly indicated as optional and some fields that have all blank will be replaced by 0
 - **Expanded contractor number is required.** This is the existing 5 character contractor # followed by 3 blank spaces. In the future, those additional 3 spaces may be used for enhanced basys functionality.
 - **Job type:**

For all contracts/suffixes except Supply Division (G+ suffix)

- The Job Type is used to determine Workers Compensation/Disability (EESISP) rates for each member
- The Job Type must include one of the Job Types in the table below
- If the Job Type selected is **Non-WrapUp**, you will be charged a **Non-WrapUp** rate for the member(s)
- If the Job Type is left **BLANK**, you will be charged a **Non-WrapUp** rate for the member(s)

Job type	Description
WU-SchoolC	Wrap-up for School Construction Authority
WU-MTransA	Wrap-up for Metropolitan Transit Authority
WU-PortAut	Wrap-up for Port Authority
WU-Airport	Wrap-up for Airport
WU-LIRailR	Wrap-up for Long Island Railroad
WU-MNRailR	Wrap-up for Metro North Railroad
WU-Private	Wrap-up for private jobs (non-public entities)
Non-WrapUp	Non-WrapUp

For Supply Division (G+ suffix)

- The Job Type is used to determine Workers Compensation/Disability (EESISP) rates for each member
- The Job Type must include one of the Job Types in the table below
- If the Job Type is left BLANK, your file will be rejected

Job type	Description
Admin	Administration
OpsWhs	Operations/Warehouse
Driver	Drivers
Sales	Salespeople

- **Job Location: is required**
- The old layout has a record's length of 300 bytes (characters). In the new layout, the records have a length of 343 bytes. **The first 300 bytes are the same in both old and new layouts.**
- **The new layout requires an additional 43 bytes at the end of each record as follows:**
 - **Header record:**
 - 8 bytes for **expanded contr # (contractor number)**
 - 35 bytes for **filler** (blanks)
 - **Detail record:**
 - 8 bytes for **expanded contr # (contractor number)**
 - 10 bytes for **job type (see chart above)**
 - 25 bytes for **job location**
 - **Trailer record:**
 - 8 bytes for **expanded contr # (contractor number)**
 - 35 bytes for **filler** (blanks)
- The new layout is detailed below. Differences between the old and new format are highlighted in yellow.

2. EESISP SPECIAL CODES

2.1. The EESISP Special Code is an optional value of "P" in position 295 in the details

3. ADDITIONAL COMPENSATION

3.1. Additional compensation wages are for either bonus or vacation time or holiday pay; one field will be used to submit a dollar amount for either of these types. basys doesn't need to distinguish between them.

3.2. Additional Compensation will be a dollar amount or a null. It is not required; if there is nothing to submit employers will leave it empty, they will not submit it with a zero value

3.3. The dollar amount will be sent in 10 spaces from positions 285 - 294 in the details and will be right justified.

Should have leading 0s or blanks. 2 decimals are used for the pennies

Example: \$100 would be 0000010000 or 10000 in position 285-294

Positions 183 to 284 should be 0s or blanks

3.4. Only EESISP and NEBF should be calculated for Additional Compensation; no other fund calculations apply.

3.5. Additional compensation totals will not be in the trailer.

4. NEW LAYOUT

INPUT FILE

Joint Industry Board payroll transmittal system.

- There are 3 record types within the file: header, detail, and trailer (trailers include totals).

- For each contract type/suffix (CA, VO, etc.) within a contractor, there must be header, detail and trailer records.

Record length - 343 blocked by 10

HEADER RECORD

Description	Start Position	End Position	Length	Format or content	Comment -
record id	1	1	1	X(1)	Fixed value="1" Cannot be blank
contr #	2	6	5	X(5)	3 digit contractor number + 2 digit suffix – Cannot be blank
